DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36 are drawn to a control system apparatus and method for controlling addressable lighting device, classified in class/subclass 315/ 316.
- II. Claim 37 is drawn to method of programming addressed lighting device, classified in class/subclass 340/ 3.5.

These inventions above are distinct from the other because of the following reasons:

1. Invention I, including claims 1-36, discloses apparatus and method for controlling lighting devices, wherein the lighting devices having changeable addresses for transceiving signals via commands of a microcontroller and remote control means while the invention II covered claim 37, discloses method of programming addressable lighting devices using a particular type of command, data protocol, for transmitting data signal to the lighting devices.
2. Because these inventions I and II are distinct for the reasons given above and the search required for each invention group is different, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
